CARTER JON

BRUTE

F/V Carter Jon Landings 2026

- The F/V Carter Jon landed 1,336,575 lbs.
- A total of 24 deliveries.
- Trip average 55,690 lbs/ 25MT
- We logged 86 days at sea.
- We almost doubled last years production.

BPI COMPOSTABLE • COMPOSTABLE EXCEPT IN

2027 Jordani Prediction

- Largest recruitment of zeros in the last 10 years
- All three Western States reporting zero age shrimp
- 2026 season will have a large carry over into 2027
- This all combined bodes well for the 2027 season
- Two additional processing plants will increase production
- 2027 West Coast landings of Jordani should increase too?

USDA Announces New Office of Seafood

USDA
OFFICE OF
SEAFOOD

USDA New of Office of Seafood

- Purpose: The office helps commercial fisherman,seafood processors navigate and access U.S.Department of Agricultures (USDA) programs. (USDA)
- Background:The Office of Seafood follows President Trump's executive order titled "Restoring American Seafood Competitiveness". (USDA)
- The America First Seafood Strategy is a comprehensive, interagency initiative designed to revitalize the domestic fishing industry and position the United States as the dominant global leader in seafood production. (NOAA)
- Jordani Shrimp already is a USDA section #32 category

AMERICA FIRST

Seafood Strategy

FIVE PRIORITIES

1. American Seafood First: Labeling, Marketing, and Market Access
2. Rebuilding America's Seafood Infrastructure & Processing Capacity
3. Fair Trade & Import Compliance and Enforcement
4. Regulatory Reform & Industry Partnership
5. Strengthening American Health Through Seafood

Looking Ahead: Advancing all five of these priorities together, the Strategy aims to increase the share of the seafood that is harvested, landed, Processed, and sold in the United States.

This will strengthen coastal communities, support American jobs, enhance National Seafood Security and ensure that US fisherman and seafood businesses can compete successfully at home and abroad, ultimately putting more American Seafood on American plates.

Sharing an Ecosystem With Giants

- Our West Coast ecosystem is called the “California Current”, there are only four ecosystems like this in the world.
- Imagine a conveyor belt of nutrients hundreds of miles long.
- These nutrients feed 1000’s of Humpback and Blue whales.
- Our Oregon shrimp fleet fishes in harmony with the largest mammals on the planet, the Blue Whale.
- I made a video clip of these interactions. It was simply one of the most impressive displays of a ecosystem feeding thousands of whales at once. Enjoy!
